Sami Majadla
JavaScript Full Stack Developer
Vancouver, BC/Internet
majadla@post.harvard.edu

EDUCATION

2011   **Harvard University**
                Computer Science B.A

PREVIOUS CONTRACTS

2017   **Town of Newmarket** - Developer

Developed an interactive map-centric web app *(desktop resolutions only)* for the town of Newmarket in Ontario, Canada using ReactJS, MongoDB, & Node.js.

2017   **mimik technology** - Developer

Worked as a front-end developer for mimik technology. Using a full TDD approach, I created all the components for an Android TV app written in ReactJS.

2016   **Captain401** - Developer

Worked remotely as a full-stack developer for San Francisco based startup Captain401. I coded numerous backend scripts in Node.js to automate tasks, and rebuilt a portion of their platform's front-end using ReactJS.

2015-2016   **Aequilibrium Software** - Developer

Worked as a front-end developer at Aequilibrium's client iQmetrix. I helped build a new platform by creating complicated front-end components using Marionette.js & Backbone.js.

2015-2017   **Junxion Strategy** - Developer (multiple contracts)

Built & upgraded interactive web-based map interfaces, and more.

2010-2015   Developed + deployed a variety of platforms (Node.js /
                MongoDB / Backbone.js / Marionette.js).

2010   **Harvard Student Agencies** - Director of E-Commerce Tech Team

Managed a team that created and upgraded the websites for Harvard Student Agencies - the largest student run corporation in the world. These were mainly E-Commerce websites. Rebuilt the 3 largest websites myself using Ruby on Rails.

ENTREPRENEURSHIP

I founded the following start-ups & designed all of their core technologies. I also programmed most of the software myself. Full stack development with

JavaScript, using NodeJS, MongoDB, Redis, Backbone.js, various APIs & libraries, and my own proprietary frameworks & modules.

2014   **AnimakeIt** - Co-founder, CEO, & CTO

An in-browser animation platform that allows users to create animated collages using the Leap Motion sensor. Accepted into LEAP.AXLR8R program in San Francisco. Project converted into a live interactive collaborative installation environment for concerts. https://www.youtube.com/watch?v=tL06lRCVoi4

2013-2015   **GoodMapper** - Founder, CEO, & CTO

A web platform that lets anybody generate interactive & video-enabled maps from a spreadsheet. Used successfully by somebody running for a seat on the city council of Cambridge, MA. youtube.com/watch?v=lxJVvYcFKCo

2011-2013   **RapCities** - Co-founder, CEO, & CTO

A platform that visualized the world of rap & hip-hop with various interactive web-apps. This included a map of NYC containing 1000s of hours of hip-hop culture videos plotted geographically, and a series of pages focused on individual celebrities & their discography. Facebook page reached over 74,000 likes. facebook.com/RapCities

TECHNOLOGY

Web-centric: JavaScript, Node.js, ReactJS, ES6, ES7, HTML5, CSS3, Aphrodite, Bootstrap, JQuery, Underscore.js, Backbone.js, Marionette.js, Leaflet.js, MongoDB, Web Sockets, Git, various templating engines, various unit testing frameworks, Unix/Linux, various cloud service providers, & more.

Other: I have used C, C++, Java, & Processing extensively.

I am a very fast learner of new languages, libraries, APIs, frameworks & more.
